

STERAMIST®

POWERED BY BINARY IONIZATION TECHNOLOGY®

GETTING BACK TO BUSINESS WITH STERAMIST®

INDUSTRY-LEADING SPEED

Help keep your scheduled reopening on track with the power of SteraMist technology, which is EPA-registered and Organic Materials Review Institute (OMRI) listed.

EXPANSIVE EPA REGISTRATION

Includes Lists G (Norovirus), H (MRSA), K (*C. difficile*), L (Ebola), M (Influenza), and List N for Emerging Pathogens, such as the SARS-CoV-2 Coronavirus.

HIGH MATERIAL COMPATIBILITY

Ensure that your facility surfaces remain undamaged after treatment with ionized Hydrogen Peroxide (iHP™). Powered by a sole active ingredient of 7.8% hydrogen peroxide, iHP™ provides a versatile disinfection.

WILL YOU BE READY TO REOPEN?

Treating your facility before opening your doors to the public offers you a wealth of benefits - from providing a high-log kill on many spores and the inactivation of viruses such as SARS-CoV-2 Coronavirus to mitigating the risk of infection and contamination from facility surfaces within only seconds.
